Wolt Hiring Team,
Helsinki, Finland

Dear Wolt Hiring Team,

My name is Uzer Ahmed, and I'm currently pursuing my MSc in Data Science at Leiden University. When I came across your Data Science (Analytics) Internship, I couldn't resist applying Wolt's blend of logistics, experimentation, and data-driven decision-making perfectly matches what excites me most about this field.

Why Wolt?
I've always admired how Wolt uses data to optimize delivery routes, experiment with pricing models, and enhance user experiences. As someone who geeks out over A/B testing, causal inference, and extracting insights from messy datasets, I'd love to contribute to your mission of making cities more convenient—one data point at a time.

Why Me?
- Hands-on Learning: I don't just study theory I test it. For example, I once scraped food delivery data to analyze peak order times and even built a small model predicting wait times. (Spoiler: Rain = longer deliveries.)
- Problem-Solver Mentality: When I hit a coding roadblock, I refuse to give up.
- All-In Commitment: Though I'm based in the Netherlands, I'm fully ready to relocate to Helsinki for this opportunity. The chance to learn from Wolt's team is worth every mile!

My Submission & Next Steps
I've attached my assignment, where I tackled the problem with curiosity, rigor, and a focus on business impact. I'd love to discuss how my skills could support Wolt's goals and maybe even share more about my food-delivery data side projects!

Thank you for your time and consideration. I'm eager to hear from you and would welcome the chance to contribute to Wolt's data-driven success.

Best regards,
Uzer Ahmed
